

Pressure limiter ÜB...A4 and NB...A4

5.06

DUNGS®
Combustion Controls

Technical description

The pressure limiters ÜB...A4 and NB...A4 are adjustable pressure switches as per EN 1854 for automatic burner controls.

They are suitable for switching a circuit on, off or over on changes in actual pressure value relative to the set reference value.

The reference value (switching point) is adjusted on a setting wheel provided with a scale. Test nipple integrated in metal housing as standard.

Application

Pressure monitoring in firing, ventilation and air-conditioning systems. Suitable for gases of families 1,2,3 and other neutral gaseous media.

Approvals

EC type test approval as per EC Gas Appliance Directive:

ÜB...A4	CE-0085 AO 3220
NB...A4	CE-0085 AO 3220

EC type test approval as per EC Pressure Equipment Directive:

ÜB...A4	CE0036
NB...A4	CE0036

Approvals in other important gas-consuming countries. Special designs for the North American market with U_L, FM and CSA registrations.

Functional description

Single-acting pressure limiter in pressure range.

The pressure limiters work without using any auxiliary power.

ÜB...A4, NB...A4 pressure limiters

The control unit responds to pressure. Interlock is performed when the set reference value is exceeded or undershot.

The "Locked" switching state is indicated by a glow lamp.

Restart is only possible by activating the reset button on the setting wheel of the pressure limiter after the operating pressure is attained.

ÜB...A4: Switches and locks when the set pressure is exceeded.

NB...A4: Switches and locks when the set pressure is undershot.

ÜB...A4 switching function

As pressure rises

2 NO closes, 1 NC opens
Glow lamp ON, locked.

NB...A4 switching function

As pressure falls

2 NO opens, 1 NC closes
Glow lamp ON, locked.

Operating state

Specifications

Max. operating pressure	NB, ÜB 50-150 A4 NB, ÜB 500 A4	500 mbar (50 kPa) 600 mbar (60 kPa)
Pressure connection	Standard: Optional:	G 1/4 female thread on centre of housing underside as per ISO 228 additionally G 1/4 female thread on opposite measuring connection side
Measuring connection	Test nipple integrated in metal housing, $\varnothing$ 9	
Temperature range	Ambient temperature Medium temperature Storage temperature	-15 °C to +70 °C -15 °C to +70 °C -30 °C to +80 °C
Materials	Housing Switch Diaphragms Switching contact	aluminium die casting polycarbonate NBR Agr
Switching voltage	AC eff. min. 10 V DC min. 12 V	max. 250 V max. 48 V
Nominal current	AC eff. 10 A	
Switching current	AC eff. min. 20 mA AC eff. min. 20 mA DC min. 20 mA	max. 6 A at $\cos \varphi$ 1 max. 3 A at $\cos \varphi$ 0,6 max. 1 A
Electrical connection	Standard: Special design:	at screw terminals via PG11 cable gland plug connection for line sockets as per DIN EN 175 301-803, 3-pin with protective contact
Degree of protection	IP 54 as per IEC 529 (EN 60529)	
Adjustment	In a vertical position NB...A4: As pressure falls ÜB...A4: As pressure rises If installation position deviates, note change in switching point	
Setting tolerance	$\pm 15\%$ switching point deviation based on the setpoint and with unit installed in a vertical position	

Dimensions [mm]

ÜB ... A4, NB ... A4

ÜB, NB ... A4/ÜB, NB ... A4

SW = Wrench width

Installation position

Standard installation position

When installed horizontally, the pressure switch switches at a pressure higher by approx. 0.5 mbar.

When installed horizontally overhead, the pressure switch switches at a pressure lower by approx. 0.5 mbar.

When installed in an intermediate installation position, the pressure switch switches at pressure deviating from the set reference value by max. ± 0.5 mbar.
